Education

October 2021 – November 2024

Software Engineering

Polytechnic Faculty, University of Zenica

September 2017 – June 2021

Engineering Technician

STŠ "Kemal Kapetanović" Kakanj

Skills

Programming Languages:

C++, Java, JavaScript, MEAN (MongoDB, Express.js, Angular, Node.js), Microsoft SQL Server, MySQL, PHP, PostgreSQL, Python, React Native (Expo), .NET MAUI, HTML, CSS.

Tools:

Figma, Microsoft Office, Jira, Confluence.

Other Skills:

Responsible and organized, team-oriented, communicative, collaborative, eager to progress and learn.

Languages

Bosnian/Croatian/Serbian

English

Experience

October 2023 – December 2023

Maasu Group BH d.o.o.

Embedded Systems Intern

I contributed to the automotive inverter controller project during an eight-week internship. I applied VHDL code using Vivado on the PYNQ-Z2 FPGA board, demonstrating technical expertise. We managed the project phases using the V-model, Confluence, and Jira. I showcased knowledge of industry standards such as ASPICE, ISO 26262, ISO 9001, and TISAX. I was involved in unit, integration, and system testing with mentorship support. This internship reflects my dedication, innovation, and contribution to the project's success.

Certifications

2023: Maasu Group BH d.o.o., Internship Certificate in Embedded Systems

2023: CodeSmash Hackathon - Public Waste Recycling

Awards and Recognitions

2023: Second place at the CodeSmash Hackathon 2023, competing against 29 teams from all over Bosnia and Herzegovina.
